

INSTALPACK

General description

The Instalpack consists of rubber-metal vibration absorbers, especially indicated for elastic support of airconditioning units and small machines. They protect the environment against the transmission of vibrations, impacts and structural noise. They are one of the most highly evolved series of rubber vibration absorbers, being one of the most complete, safest and offering the best behaviour and stability. The Instalpack is easy to install and economical.

Technical specifications

Manufactured in NR (natural rubber) 55°Sh A.

Each pack includes :

- 4 rubber vibration absorbers
- 8 nuts M8 zinc coated
- 8 washer M8 zinc coated

CODE	DESCRIPTION	A (mm)	B (mm)	C (mm)	D (mm)	DM (mm)

INSTALPACK

Assembly

- Attach the support to the wall.
- Fasten the vibration absorbers to the support.
- Mount the unit onto the vibration absorbers.
- Attach the vibration absorbers onto the holes in the unit.

Applications

Exterior air conditioning units

Motors and pumps
